Hi Dave - There hasn't been much progress made in the non-forestry areas as far as ag goes, and the initial written assessment is really only supposed to talk about the IR-TMDL's progress towards meeting BMPs for the additional forestry management measures. That's why the letter focuses on those areas. On-site disposal and new development areas are two other areas that we have to fully approve for CZARA, but they aren't being done through the IR-TMDL. We included that in the enclosure, but not in the cover letter.

Given the amount of time we have and the need to coordinate with NOAA to get signatures, I think it's best that we move forward with the letter and prep for the phone calls. Next time, I'll try to give you and Jayne the heads up on how big of an issue this could be so you're not caught off guard. If you want to talk more, feel free to give me a call.

Dave --

Christine draft desk statement actually reminds me of another comment/question I considered but didn't end up conveying.

Would it make sense for our cover letter to acknowledge (apparent) progress in the non-forestry areas? If accurate, it seems like this would give a nod to their progress while also providing fuller contextual linkage back to the settlement. DanO.

Jayne, thanks. Will you or someone else be providing the phone numbers for the folks to that we will be calling? It would help. I took a shot at a draft desk statement. Tried to make it more user friendly. Want to make sure that it is accurate (not precise, mind you), but accurate. So, take a look and give me feedback before I sent it on to Mark MacIntyre.

Hi Dan,

Regarding cc's to the letter, Bill Blosser is still the Chair of OEQC through 6/30/2013. See <http://www.deq.state.or.us/about/eqc/eqcmembers.htm>

You are correct. We only need to include Nina Bell in the cc's as the plaintiff.

Attached is the initial Communication Plan. Please review with focus on key messages and communications table.
